PRACTICE BEFORE THE PATENT AND TRADEMARK OFFICE -GOVERNMENT EMPLOYEES

On October 4, 1988, the Federal Register contained a notice removing section 10.6(d) of Title 37 of the Code of Federal Regulations. 53 Fed. Reg. 38,948, October 4, 1988. A decision in the U.S. District Court for the District of Columbia held that paragraph (d) was invalid to the extent that it precluded registration of an otherwise qualified individual solely on the basis of his or her status as a U.S. Government employee. *Athridge v. Quigg*, 655 F. Supp 779, 3 USPQ2d 1391 (D.D.C. 1987).

Under section 10.6(d), registered patent practitioners who were disqualified by statute from practicing as an attorney or agent in patent proceedings or other matters before Government departments or agencies were endorsed on the register as "inactive." By removing section 10.6(d), U.S. Government employees, not employed by the U.S. Patent and Trademark Office, may now be registered as "active" on the register irrespective of their official duties. *In re Atheridge*, 4 USPQ2d 1656 (Comm'r Pat. 1987).

The Office of Enrollement and Discipline (OED) has compiled the names and addresses of registered patent attorneys and agents, not employees of the U.S. Patent and Trademark Office, who are currently endorsed as "inactive" on the register. On November 30, 1989, a letter was sent to the each of these individuals at the last address furnished to OED informing them that they may change their status to "active."

The following individuals have not responded to the letter.

IMPROVEMENT TO SERVICES

•*New File Ordering Service Introduced*•Members of the public can avoid standing in line to order patent files and instead can place orders using two computer terminals which have been installed in the Patent Search Room. The terminals are located next to the windows on the east side of the north stack area near the mezzanie elevator.

These terminals have been made available so that requesters may determine the location of files for *issued patents* and to place orders for them. Files ordered via the terminals may be picked up from the Files Information Unit (CP3-1D01A) in the usual manner. Instructions for using the terminals are posted at each terminal.

HELPFUL HINTS

Here are some helpful hints for facilitating the assignment recordation process:

1. Each assignment should be submitted with a cover letter. This cover letter should include, at a minimum:

- application, patent or registration number of the application, patent or registration being transferred;
- name of the party transferring the application, patent, or registration and to whom it is being transferred;
- brief description of what the document intends to accomplish (such as an assignment, a security agreement, or a license);
- total fee submitted or to be charged to a deposit account (at $8 per application, patent and registration being transferred) and the deposit account number. Avoid statements such as "Please charge the appropriate amount to my deposit account." However, you may authorize any additional fees to be charged to the deposit account to avoid receiving a non-recordation notice for insufficient fees.
- address to which the document should be returned after it is recorded by the PTO.

Cover letters should be formatted for easy reading.

2. Each assignment should be accompanied by a separate cover letter. More than one application, patent, or registration can be identified in an assignment.

3. If an assignment is submitted with a new application, send two separate cover letters - one for the application and one for the assignment.

4. Assignment documents which transfer an interest in both patent and trademark matters are first processed through the automated patent assignment recordation system and then through the manual trademark assignment recordation system. This sequential processing causes a delay in returning these assignment documents. To avoid a delay, submit separate assignment documents, one for patent matters and one for trademark matters, each with its own cover letter.

5. All assignments should be submitted on bond weight paper that is no larger than 8 1/2" x 14". Only the front side of each sheet should be used, and a one inch margin should be left on all sides of each sheet of paper.

6. Assignments filed with new applications are stamped with the application number. Assignments of new applications not filed concurrently with the application should be held until the application number can be provided in the cover letter.

7. All assignments should be mailed to BOX ASSIGNMENTS unless they are filed concurrently with a new application.

8. Requests for assignment services (recordation, abstracts, certified copies) should be carefully proofread to ensure document numbers and addresses are correct.

SERVICE STATISTICS DEFINITIONS

The number of days to record patent and trademark assignments that is presented in the Service Statistics portion of the Official Gazette represents the time the majority of assignments are being recorded (mode). Some assignment documents will take a shorter or longer time. The two week date range for returning documents stated in Service Statistics represents the majority of documents being mailed on the last work day of the reporting period. Once again, this date is not absolute.

Reference Collection of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
